

**MxPx's Mike Herrera to Release
Guitar Center Limited Edition 7" Picture Disc**

**Pre-Order Live Now on MxPx.com; Includes Custom Guitar Pick,
Lyric and Chord Change Sheets, and More**

Los Angeles, CA, November 5, 2013 -- On November 19, legendary MxPx singer and bassist **Mike Herrera** will release a limited-edition 7" picture disc vinyl of his *Guitar Center* podcast with **Nic Harcourt** acoustic performance via **Rock City Recording Company**. The set was recorded at Guitar Center's iconic Sunset Boulevard location on June 28, 2012, while the band was in the midst of its 20th anniversary tour.

Side A features a live rendition of "Secret Weapon," the title track from the band's 2007 classic album *Secret Weapon*, while Side B is "Aces Up," from group's latest album, last year's *Plans Within Plans*. Just in time for the holidays, it's a must-have for all MxPx faithful and vinyl aficionados alike.

These intimate, stripped-down acoustic interpretations show both **Herrera's** songwriting and performance prowess. As a bonus, fans will receive a download of all four songs from the *Guitar Center* podcast—including "Doing Time" and "Drowning." Downloads will be available to all who purchase by November 19 through MxPx.com. Moreover, the pre-order package also comes with a custom-designed **Mike Herrera Music** guitar pick with the MHM logo on one side and the artist's signature on the other. In addition, fans will receive a copy of his lyric and chord change sheets for "Secret Weapon" and "Aces Up," as well as his personal signature.

About this special release, **Herrera** comments, "I personally love collecting vinyl. That has morphed into a love of releasing collectable vinyl for each new musical endeavor I embark upon. I'm further down that wax road with this limited-edition live picture disc. This is a jumping-off point to introduce even more new songs and my personal style to a still growing and wonderful audience."

Herrera is prepping more solo material for a 2014 release. Pick up the pre-order now!
